M. Arthur de Warelles. Medium flower, shaded salmon with orange stains.
W. E. Gumbleton. Bright nankeen, centre of the lobes darker, spotted olive-green.

AZALEA MOLLIS. — Seedlings.

Seedlings, fine varieties in mixture: red, rose, carmin, salmon, orange, nankin, yellow, etc.

Without doubt these « seedling varieties » of *Azalea mollis* are the most valuable « commercial plants » for *Winter* flowering that have ever been introduced, either as cut-flowers or for *Conservatory* decoration; my strain is of the best, consisting of the above colours, and being seedling plants are of wonderfully vigorous growth.

Tens of thousands leave my nursery every year.
